

Duration: The operational deflection shape and modal analysis training is 4.5 days starting on Monday morning and ending at noon Friday.

Prerequisites: None

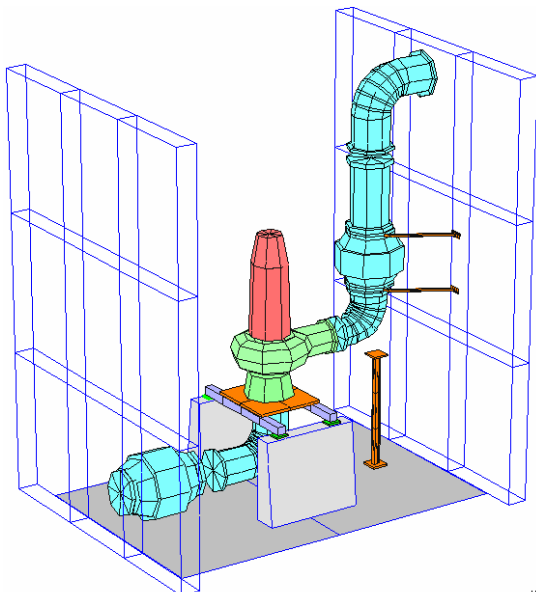

Course Content: This course teaches how to do ODS and Modal jobs. We cover the job planning, ODS and Modal measurements, use of ME'scope software and analysis of the test results. Modal analysis is covered at an introductory level.

After taking this class, you will know the steps involved in doing ODS and Modal testing and how to use ME'scope software.

In Class: Each student will receive a course book. Laptops will be provided in class loaded with ME'scope VES version 5 software. Bring your own laptop and software to use in class if you wish.

Learn how to do Operational Deflection Shape and Modal Surveys on machines and structures. See exactly how the machine vibrates from operational forces and resonance. Experience the power of ODS and Modal testing.

Need ODS and Modal software? We sell ME'scope VES software. Ask for a quote.

Practical Aspects of ODS and Modal Analysis Testing

Featuring ME'scope Software

Niagara Falls, NY

Sept 27– Oct 1, 2010

Monday—Friday noon
Course fee \$1700 USD

The Conference Center, Niagara Falls, NY

101 Old Falls Street
Niagara Falls, NY 14303

The main entrance to The Conference Center Niagara Falls is on Old Falls Street (cobblestone walkway off of 3rd street on the left side) directly across from Seneca Niagara Casino. Look here for more directions: <http://www.conferencecenterniagarafalls.com/> Click on "Directions".

For students needing hotel accommodations:

You must make your own hotel reservation. The Conference Center is adjacent to the Crowne Plaza Hotel and across the street from the Seneca Niagara Casino and Hotel. The Holiday Inn is just down the road about .15 miles away.
